<b>Disinfects to kill 99.9% of germs and bacteria</b>	✓	✓	✓	✓	✓
<b>Remove mold and mildew stains</b>	✓	✓			✓
<b>Can be used for emergency water disinfection</b>	✓				

\*Always refer to the product label for dilution and usage directions.

# General Disinfection & Sanitization

## Disinfecting hard, nonporous surfaces

1

Pre-clean the surface of any visible material.

2

Make disinfection solution  
1/2 cup Clorox Commercial Solutions® Clorox®  
Germicidal Bleach + 1 gallon of water

3

Wipe surface area with bleach solution.

4

Allow solution to contact the surface for at least 5 minutes.

5

Rinse well and air dry.

## Sanitizing food-contact surfaces

1

Pre-clean the surface of any visible material.

2

Make sanitizing solution  
2 tsp. Clorox Commercial Solutions® Clorox®  
Germicidal Bleach + 1 gallon of water

3

Wipe surface area with bleach solution for 2 minutes.

4

Allow surface to air dry.

# Remove Mold & Mildew

## Remove mold and mildew from indoor walls

1

Open windows to ventilate the area where you are working.

2

Pre-clean the surface of any visible material.

3

Make cleaning solution  
 $\frac{3}{4}$  cup Clorox Commercial Solutions® Clorox® Germicidal Bleach + 1 gallon of water

4

Apply the bleach and water solution to the surface.

Allow it to sit in contact with the mold/mildew for 5 minutes.

5

Rinse with water and air dry.

Note: You may need another application if the problem is severe.

## Remove outdoor mold and mildew

1

Thoroughly water any plants near the area where you will be working. Protect larger plants by covering them with plastic sheeting.

3

Pre-clean the surface of any visible material.

2

Make cleaning solution  
1½ cups Clorox Commercial Solutions® Clorox® Germicidal Bleach + 2 gallons of water

4

Apply the bleach and water solution to the surface with a scrub brush.

5

Reapply as needed to keep the surface wet for 5 minutes.

6

Rinse the treated area thoroughly and let surfaces air dry.

7

Re-water any nearby plants that may be getting runoff.

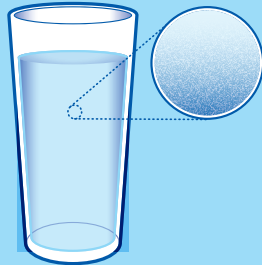

Commercial SOLUTIONS®

# Disinfect water in case of emergency

**ALWAYS**  
start by doing  
the following

**1** Check water for clarity and suspended material.

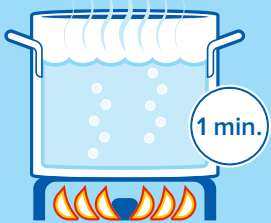

**2** Filter water through a clean cloth or coffee filter into a clean container.

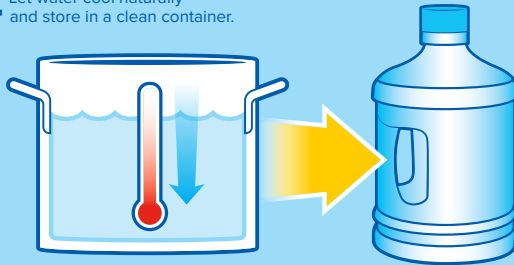

**Boil your water to make it drinkable**

**3** Boil water for at least one minute. This helps kill bacteria and viruses.

**4** Let water cool naturally and store in a clean container.

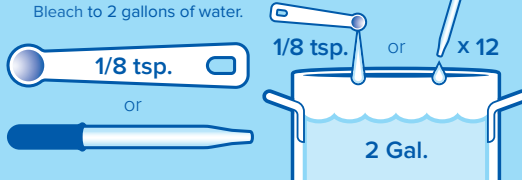

**When boiling is not possible, use Clorox Commercial Solutions® Clorox® Germicidal Bleach to disinfect water**

**3** Check bottle label — you can use Clorox Commercial Solutions® Clorox® Germicidal Bleach<sub>1</sub>, or Clorox® Regular-Bleach<sub>2</sub>. **DO NOT USE** scented, color-safe or bleaches with added cleaners.

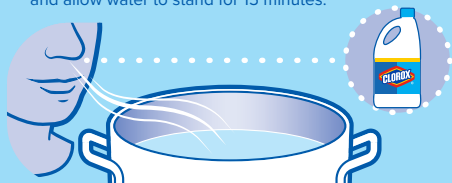

**4** Find a clean measuring spoon (or a clean dropper). Add 1/8 tsp. (or 12 drops) of Clorox Commercial Solutions® Clorox® Germicidal Bleach to 2 gallons of water.

**5** Stir, then let water stand for 30 minutes.

**6** Check and confirm that water **DOES** have slight bleach smell. If no bleach smell, repeat dosage and allow water to stand for 15 minutes.

**7** The water is ready to drink.

**8** If bleach taste is too strong, pour cleaned water between clean containers several times and let it stand for a few hours before use.

# Protect Yourself from Mosquitoes

## Protect & Prevent

AVOID MOSQUITO BITES

 <p><b>LONG CLOTHING</b></p> <p>Wear long-sleeved shirts and long pants.</p>	 <p><b>KEEP MOSQUITOES OUTSIDE</b></p> <p>Stay in places with air conditioning or that use window and door screens.</p>	 <p><b>ELIMINATE STANDING WATER</b></p> <p>Empty containers that hold water around your home or facility could become breeding grounds for mosquitoes. Pre-wash containers, then wipe with a bleach solution (½ cup Clorox Commercial Solutions® Clorox® Germicidal Bleach to 1 gallon water) and allow the solution to contact the surface for at least 5 minutes. Rinse well and air dry.</p> 
 <p><b>SLEEP WITH A NET</b></p> <p>If you're overseas or outside and unable to protect yourself from mosquito bites, sleep under a mosquito net.</p>	 <p><b>INSECT REPELLENT</b></p> <p>Use Environmental Protection Agency-registered insect repellents. (Read label prior to use on children.)</p>	

NOTE: Information intended for use by consumers in those geographic areas affected by Zika, dengue and chikungunya.

# Protect Yourself from Mosquitoes

## Clean & Disinfect

4 STEPS USING BLEACH

 <p><b>ELIMINATE STANDING WATER</b></p> <p>Empty containers that hold water around your facility could become breeding grounds for mosquitoes.</p> 	<p><b>1</b></p>  <p><b>Pre-Wash: Scrub Surfaces Until Visibly Clean</b> Apply the same day</p>	<p><b>2</b></p>  <p><b>Wipe the Surfaces with</b> Clorox Commercial Solutions® Clorox® Germicidal Bleach Solution (½ cup + 1 gallon water*) and allow to contact surfaces for 5 minutes.</p>
	<p><b>3</b></p>  <p><b>Rinse and Air Dry Immediately</b></p>	<p><b>4</b></p>  <p><b>Cover or Turn Over</b> Prevent empty containers from refilling</p>

NOTE: Information intended for use by consumers in those geographic areas affected by Zika, dengue and chikungunya.
