Operating Room Cleaning Between Procedures

Cleaning the OR between procedures can be a challenging task. Consider developing a checklist of OR environmental surfaces EVS staff should clean and disinfect that best fits your facility's layout and policies. An example checklist is presented below.

Name: _____

Date: _____ Room No. : _____ Initials of EVS Staff: _____

	Cleaned	Not Cleaned	Not Present in room	Deemed Unnecessary
Anesthesia cart and equipment (including IV pole)				
Anesthesia machine				
Patient monitors				
OR bed				
Table strap				
OR bed attachments				
Positioning devices				
Patient transfer devices				
Overhead procedure lights				
Tables and Mayo Stand				
Equipment (mobile or fixed)				
Storage cabinets, supply carts, furniture				
Light switches				
Door handles or push plates				
Telephones and mobile devices				
Computer				
Chairs, stools, step stools				
Trash and linen receptacles				
Walls				
Floors				
Wheels				
Casters				

Please comment on any areas not referenced above:

This room looks clean and ready for use.

Employee signature _____

Supervisor signature, depending on your facility's procedures _____
