4. WRING

out excess liquid.

Clorox® Germicidal Bleach
Item # 30966, 121 fl. oz.

5. WIPE

the surface.

6. MAKE SURE

the surface stays wet for 5 minutes.

7. DISCARD

used wipes, do not reuse.

Best Practices for Using CloroxPro™ Clorox® Germicidal Bleach

Key tips:

- ▶ To prevent residue build up, periodically wipe surfaces with a clean damp cloth.
- ▶ Clean surface first to remove soil, especially gross or visible soil.
- ▶ Make sure to apply enough diluted bleach solution to keep the surface wet for 5 minutes.
- ▶ If necessary, reapply diluted bleach solution to keep the surface wet for 5 minutes.
- ▶ Do not reuse soiled wipes. Use a new wipe or cloth regularly.

What type of cloth can be used?

Common bleach-compatible wipes/cloths include:

- ▶ Synthetic dry wipes, best if 100% polyester.
- ▶ Microfiber cloths, best if 100% polyester.
- ▶ Cotton cloths.
- ▶ DO NOT use paper towels to apply bleach, as paper towels will rip and tear.
