

# How to Use Diluted Solutions of CloroxPro® Clorox® Germicidal Bleach in Your Facility

## APPLYING WITH A WIPE OR CLOTH

**1. START** with diluted bleach based on desired concentration.

**5. WIPE** the surface.

**2. REMOVE** gross soil.

**6. WAIT** to make sure the surface stays wet for 5 minutes.

**3. DIP** a clean or new wipe or cloth into the bucket of diluted bleach solution.

**7. DISCARD** Trash disposable wipes and launder reusable cloths.

**4. WRING** out excess liquid.

## APPLYING WITH A SPRAY BOTTLE

**1. START** with diluted bleach based on desired concentration.

**4. WAIT** to make sure the surface stays wet for 5 minutes.

**2. REMOVE** gross soil.

**5. WIPE** surface with a clean damp cloth or paper towel to prevent residue build-up.

**3. SPRAY** surface until thoroughly wet using coarse sprayer.

Clorox® Germicidal Bleach  
Item # 30966, 121 fl. oz.

## Best Practices for Using CloroxPro® Clorox® Germicidal Bleach

### Key tips:

- ▶ Wear protective eyewear and rubber gloves when using this product.
- ▶ To prevent residue build-up, periodically wipe surfaces with a clean damp cloth.
- ▶ Clean surface first to remove gross or visible soil.
- ▶ Make sure to apply enough diluted bleach solution to keep the surface wet for 5 minutes.
- ▶ If necessary, reapply diluted bleach solution to keep the surface wet for 5 minutes.
- ▶ Do not reuse soiled wipes.

### What type of cloth can be used?

Common bleach-compatible wipes/cloths include:

- ▶ Synthetic dry wipes, best if 100% polyester.
- ▶ Microfiber cloths, best if 100% polyester.
- ▶ Cotton cloths.
- ▶ DO NOT use paper towels to apply bleach, as paper towels will rip and tear.
