Back to Basics for Healthier Spaces

Help Protect Beyond COVID-19

Getting back together means getting back to basics. While much has changed, there are some simple facts that remain the same. Every year a variety of illnesses spread in the community leading to lost productivity. It's a fact that when people gather in shared spaces, viruses and bacteria can transfer through direct contact, air or by touching a contaminated surface.* Some illness-causing germs can live on surfaces for days or weeks.

PATHOGENS	WHAT ILLNESS IT CAUSES	SURVIVAL
Norovirus	Gastrointestinal illness/stomach flu	Days to weeks on surfaces†
Rhinovirus	Half of all common colds	4 - 25 hrs on surfaces†
Influenza A Virus	The flu	2 hrs - 2 wks on surfaces†
<i>Staphylococcus aureus</i> and MRSA	Skin (staph) infections	30 mins - 3 yrs on surfaces†

- ▶ Employers lose **\$411** per employee per day due to the flu¹
- ▶ Desktops have **400 times** more bacteria than a toilet bowl²
- ▶ **2-in-5** Americans would quit their job if their office consistently smelled bad or was consistently dirty³
- ▶ Even after being vaccinated, **81%** of people will be concerned about the cleaning and sanitizing of businesses⁴
- ▶ Restroom complaints rank **No. 1**⁵
- ▶ Cleaning professionals report that removing urine odors is their **No. 1** cleaning priority⁶

Disinfect to Reduce the Risk

By following the basics for good hand hygiene, cleaning and disinfecting properly — and killing germs on commonly touched surfaces — you can help break the chain of infection.

For public health reasons, it's important to reduce the risk of illnesses and the economic burdens caused by infections.

Give Them Peace of Mind

As businesses reopen, people want assurances these shared spaces are clean and safe. By using a well-known trusted brand, you can help them feel more protected and confident the job has been done effectively.

- ▶ **Clorox is THE most trusted brand** when it comes to disinfecting businesses[†]
